# PrimeVerse Auto-Approval Setup

*Auto-generated from Notion — do not edit by hand.*

---

## 🎯 Welcome

> *Set this up once. Then new customers get approved automatically. ⏱️ 15 minutes · 🎯 No tech skills needed*
>
> > 📍 ***Where:*** *You do this setup inside* ***SYSTM8*** *(primeverseaccess.com). When it's running, your leads get instant access to* ***PrimeVerse****.*

---

## How it works

1. A new customer signs up with your link
2. PU Prime sends you an email
3. Your email forwards it to SYSTM8 → your lead gets instant PrimeVerse access

---

## 🔑 Step 1 — Get your code

1. Log in to SYSTM8 at primeverseaccess.com
2. Open the **Profile** tab

3. Find the box called **Auto-Verification**
4. Click the gold **COPY** button

> 💡 *Keep this code safe. Don't share it.*

Your code looks like this:

verify+yourname@zapraxi.resend.app

---

## 📧 Step 2 — Pick your email

Which email service do you use for work?

- 🔵 **Gmail** → see Gmail Setup below
- 🔶 **Outlook or Hotmail** → see Outlook Setup below
- 🟢 **Custom email (forwarded to Gmail)** → see Custom Email below

---

## 🔵 Gmail Setup

### Part A · Add the forwarding address

1. Open Gmail
2. Click the ⚙️ gear (top right)
3. Click **See all settings**
4. Open the tab **Forwarding and POP/IMAP**
5. Click **Add a forwarding address**
6. Paste your code from Step 1

7. Click **Next** → **Proceed** → **OK**

## Part B · Confirm it

1. Go back to your SYSTM8 dashboard
2. Find the box **Forwarding Verification Code**
3. Wait 30 seconds, click **CHECK NOW**
4. Click the gold button that appears: **Click to confirm forwarding**
5. A Gmail tab opens → click **Confirm**

> ✅ *You should see:* ***Confirmation Success!***

## Part C · Create a filter

This makes sure only PU Prime emails are forwarded.

1. In Gmail, open **Filters and Blocked Addresses**
2. Click **Create a new filter**
3. Fill in:

| Field | Value |
|---|---|
| From | noreply@puprime.com |
| Has the words | "Client Account Opening Notification" OR "Client Registration Notification" |
| Has attachment | ✅ check the box |

1. Click the **blue Create filter** text (not "Search"!)
2. On the next screen, check 3 boxes:
   - ✅ **Forward it to** → pick your code

- ✅ **Never send it to Spam**
- ✅ **Also apply filter to matching conversations**

3. Click **Create filter**
4. If Gmail warns about spam, click **OK** — it's safe

### Part D · Test it

1. Go back to your dashboard
2. Press **Ctrl+Shift+R** to refresh
3. Click 🧪 **TEST MY SETUP**
4. You should see ✅ **Test passed**

> ✅ ***You're done!***

---

## 🔶 Outlook or Hotmail Setup

> ⚠️ ***Important!*** *Outlook blocks mail from new senders. Do the first step carefully or nothing will work.*

### Part A · Add us as a safe sender

1. Open Outlook
2. Click the ⚙️ gear → **View all Outlook settings**
3. Go to **Mail** → **Junk email**
4. Find **Safe senders and domains**
5. Click **+ Add safe sender**
6. Type: zapraxi.resend.app

7. Click **OK**
8. Scroll down — click **Save** (don't skip this!)

## Part B · Create the rule

1. Still in Settings → **Mail** → **Rules**
2. Click **+ Add new rule**
3. Name it: PU Prime Auto-Verify
4. Add 4 conditions:

| # | Condition | Value |
|---|---|---|
| 1 | From | noreply@puprime.com |
| 2 | Subject includes | Client Account Opening Notification |
| 3 | Subject or body includes | Client Registration Notification |
| 4 | Has attachment | (no value needed) |

1. Set the action: **Forward to** → paste your code
2. Click **Save**
3. Microsoft will ask to confirm with 2FA → do it on your phone

## Part C · Test it

Forward one old PU Prime email to your code. Dashboard should turn 🟢 within a minute.

> ✅ ***You're done!***

---

## 🟢 Custom Email (forwarded to Gmail)

Use this if your work email (e.g. you@yourcompany.com) already forwards to a personal Gmail.

1. Make sure the email forwarding is actually working
2. Then follow the **Gmail Setup** above — it's that simple

---

## 🚦 Status Lights

Check your dashboard to see what's happening.

| Light | Meaning | What to do |
|---|---|---|
| 🔴 Not active | Setup not done | Start at Step 1 |
| 🟡 Waiting | Setup OK, waiting for first email | Share your link |
| 🟢 Active | Everything works | Nothing — enjoy! |

---

## 🔧 Something wrong?

### The gold "Confirm" button never shows up

1. Go to Gmail → **Forwarding and POP/IMAP**
2. Click **Re-send confirmation email**
3. Wait 1 minute
4. Still nothing? Message Richy

### Dashboard still shows 🔴 after setup

Check these in order:

1. **Outlook users:** did you add zapraxi.resend.app as a safe sender? Most common problem.
2. Has a real PU Prime email come in since you set it up? If not, forward an old one to test.
3. Is your PU Prime account's email the same as where your rules are set?
4. Refresh dashboard: **Ctrl+Shift+R**
5. Still stuck? Message Richy with your code.

### Outlook warning: "This rule will forward spam..."

Click **OK** — this is normal. PU Prime is trusted.

---

## ❓ FAQ

**Do I have to do this for every lead?** No. Set it up once, it runs forever.

**Will I still get my PU Prime emails?** Yes. The system copies them — originals stay in your inbox.

**What if I change email providers?** Redo the setup on the new one. Your code stays the same.

**Can I use two emails?** No. One per IB partner.

**Is this safe?** Yes. Your code only works for your own leads.

**How fast does it work?** Under 2 minutes from signup to access.

---

## 💬 Need help?

| Issue | Who to contact |
|---|---|
| Auto-approval not working | on Telegram/WhatsApp |
| PU Prime questions | Your PU Prime IB manager |
| Dashboard bug | "Report a problem" button in dashboard |

---

> 🎯 *You're all set. Share your link — we handle the rest.*
